AKSHAT SHUKLA

ashukla20062006@gmail.com | +91 7056758070 | GitHub | LinkedIn | Portfolio

IT Undergraduate | MERN Stack Developer experienced in designing and delivering full-stack web applications, real-time communication systems, AI-powered tools, and location-based platforms. Skilled in React, Node.js, MongoDB, API architecture, and algorithmic problem solving.

Experience :

Web Intern | Zidio-development [May 2025 – May 2025]

- Led a small team to build an Excel Analysis Platform with end-to-end parsing, visualization, and user management features.
- Improved data extraction speed through optimized Node.js parsing logic, resulting in noticeably faster processing.
- Developed React-based dashboards for clear insight presentation and better usability.

Web Intern | skillcraft Technology [April 2025 – May 2025]

- Learning: Strengthened hands-on skills in frontend development while contributing to real-world projects.
- Teamwork: Worked closely with designers and developers to deliver pixel-perfect user interfaces.

ACADEMIC PROJECTS :

Nagar Sahayta Portal App – Smart Civic Reporting System | **Native App, MERN Stack, REST APIs, Maps** GitHub

- Designed a native app for real-time civic issue reporting, integrated with a government web portal for priority-based scheduling and map-driven case analysis.
- Integrated interactive map visualization to display issues geographically, improving decision-making and their efficiency.
- Implemented structured issue categorization and priority logic, enabling faster case resolution and transparent civic governance.

Resume-Analyzer - AI-Based Resume Processing Platform| **MERN, NLP, pdf-parse, MongoDB** GitHub

- Automated resume extraction (skills, education, experience) with NLP pipelines.
- Built a React-based dashboard enabling structured visualization and quick insights for recruiters.
- **Reduced processing time by 30%** using optimized Node.js parsing and MongoDB indexing.
- Implemented **secure PDF/DOCX uploads** with validation and error-free data handling.

IP Address Tracker – Real-Time Geolocation Dashboard| **JavaScript, Leaflet.js, IP Geolocation API, HTML/CSS** Tracker

- Built a live IP tracking dashboard displaying location, timezone & ISP info with 100% real-time updates.
- Integrated Leaflet.js for interactive maps, improving data visibility and UX.
- Implemented robust API error handling, **reducing failed requests by 25%**.

TECHNICAL-SKILLS:

Languages: C++, Python, TypeScript, JavaScript, SQL

Frameworks & Libraries: React.js, Node.js, Express.js

Databases: MongoDB, PostgreSQL

Developer Tools: Git, Docker, Kubernetes, Azure, VS Code, Postman, Socket.io

Core: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Computer Networks, Database Systems (DBMS), System Design

CODING-PROFILE : LeetCode | GFG | HackerRank | Unstop

CERTIFICATIONS :

- AWS Academy Cloud Foundations – 2025
- MERN Stack Developer – ABS Academy 2025
- Smart India Hackathon Participant – 2024,2025
